

Bloomberg is a leading provider of financial information for professionals around the world. The Bloomberg Message system enables Bloomberg users to communicate with other users on Bloomberg as well as internet addresses. The financial service sector happens to be a highly litigated industry. Parties involved in civil cases or government investigations need to be able to process Bloomberg Mail files along with their other electronically stored information in order to comply with court orders to produce electronic evidence.

### **Can your eDiscovery Provider Process Bloomberg Mail?**

The file formats for Bloomberg Mail are very different than other email services, such as Microsoft™ Outlook® or Lotus Notes®. A collection of Bloomberg messages typically consists of a collection of files. As a result, very few eDiscovery providers have the ability to process Bloomberg Mail, and even less can process it natively. Failure to accurately process and produce electronic evidence to comply with court orders may result in significant sanctions and/or fines, and may even influence the outcome of the case.

## **New Bloomberg® Mail eDiscovery Processing Capability**

### **Bloomberg Email Processor in Discovery Partner®**

Daticon EED has recently developed a native Bloomberg Email Processor component in the Evidence Processing Server of our hosted, integrated, review platform, Discovery Partner. Our Bloomberg Mail Processor has been designed to be compatible with Bloomberg Mail v1.6 or later, including:

- Instant Bloomberg (IB -- instant messaging between Bloomberg users)
- Bmail (email sent between Bloomberg users)
- Internet Mail (Bloomberg email sent to outside email addresses and vice versa)
- Bloomberg on BlackBerry®
- Bloomberg on iPhone
- Bloomberg on Windows Mobile

### **One Repository for All of your Electronic Evidence Reduces Risk and Cost**

Discovery Partner also features the most comprehensive eDiscovery Suite for processing Lotus Notes available today, along with a robust capability to process Outlook email and an unmatched range of other file types. We also offer complete paper discovery services, with images of documents stored in Discovery Partner along with the rest of the electronic evidence set for a case. This provides clients the ability to keep all of the evidence for a case in one repository, ensuring that the chain of evidence remains unbroken, and reducing the cost and risk of migrating data between platforms.
