

CompareVue™, a key feature of the Discovery Partner® hosted review system, uses advanced analytics to group documents in a way that dramatically reduces review costs while increasing accuracy.

First-generation, analytic review tools rely on conceptual, or topical, grouping of documents to increase review speed. Conceptual clustering is effective when reviewers' coding decisions are straightforward, and when bulk coding for the document group is appropriate. However, when more detailed and comparative analysis of content is required, grouping documents by relationship is a much more effective and accurate approach.

## CompareVue™

**Advanced Analytics for Faster,  
More Accurate Reviews**

### Relationship Clustering: When only the differences matter™

According to the Enterprise Strategy Group, email makes up at least 75% of electronic review data, and one of the greatest challenges to conducting efficient reviews is the amount of redundant content contained in email conversation threads. When quickly identifying differences between redundant documents is critical to your case, Daticon EED's relationship-based document clustering presents a clear advantage.

Daticon EED CompareVue systematically organizes documents into clusters based on relationship and similarity of content (rather than on topic). CompareVue highlights differences between one representative document and the rest of the documents in the cluster, enabling reviewers to move through documents quickly, assigning the same coding unless they identify a difference material to the case.

For these types of reviews, CompareVue delivers dramatic results:

- Higher rate of review — CompareVue highlights all differences between the documents in the cluster, greatly increasing review speed. (See figure 1.)

- **Greater review consistency and accuracy**

— Comparison of documents with a high degree of redundant content results in fewer inconsistencies and greatly enhances coding productivity.

- **Decreased review costs** — Faster, more accurate reviews dramatically reduce review costs.

## Leverage CompareVue's Powerful Analytics for Your Case

Discovery Partner powered by CompareVue offers customers faster, more accurate reviews than solutions that rely on concept clustering. To explore how Daticon EED can deliver value for your unique case, please contact us at **(425) 629-6777**. ### Proven ROI - A Case Study

Using CompareVue analysis, more than 80% of the documents in a telecommunication company's large collection were assigned to relationship clusters. The comparative review workflow enabled by relationship clustering resulted in acceleration of the review rate and an estimated cost savings of more than \$235,000

### About Daticon Electronic Evidence Discovery

*Daticon EED is a nationwide provider of eDiscovery services and technology with more than 20 years of experience managing the most complex and challenging eDiscovery projects. We combine a proven methodology, expert staff and our industry-leading Discovery Partner™ hosted review platform to significantly reduce the risk, cost and time of eDiscovery for global corporations and law firms. We offer services for both large and small cases, including case strategy, pre-review analytics, review optimization, early case assessment, as well as processing, hosted review and production. With headquarters in Kirkland, WA, and operations in Norwich, CT, Southern California, Chicago, New York, Washington, DC, and London, Daticon EED offers convenient regional support for national and international cases. For more information, please visit [www.daticon-eed.com](http://www.daticon-eed.com)*

### WHEN IS COMPARATIVE REVIEW THE MOST EFFECTIVE APPROACH?

If you need reviewers to determine whether a specific email thread is privileged, for example, comparative review is the only effective approach

Assume there are 200 emails containing related threads, and privileged information enters the thread near the end of the conversation. If the review tool has grouped documents by topic or concept, reviewers will have to closely examine every document in the entire set - because the related emails may not have been placed in the same group - to discover the privileged information.

With CompareVue, all 200 related emails will be automatically grouped together, with differences highlighted. Reviewers can then examine only the differences, and they will quickly find the privileged information and make the most appropriate coding decision.

### Discovery Partner Hosted Evidence Review

Discovery Partner®, the first offering of its kind, remains an industry leader among hosted review systems. Discovery Partner uses proven methodology with case-specific configurability for highly productive review environment. The Daticon EED Solution includes:

- Simple, intuitive user interface
- Secure access via the Internet, anytime and anywhere
- CompareVue - a unique, powerful technology that highlights difference between similar documents, resulting in a dramatic reduction in the cost of review discovery
- A rich feature set to support the largest, most complex matters
- Deep project management expertise

The Discovery Partner review system complements our customer-focused document collection, restoration and processing services.
