

## Discovery Partner

### Foreign Language Processing, Review and Production Support

As corporations increasingly face litigation involving international business transactions, the challenge of culling, reviewing and producing digital evidence in foreign languages also continues to grow. And that has meant a time-consuming process of translation, bogging down and complicating the already arduous task of eDiscovery.

Now you can do eDiscovery directly in a variety of foreign languages without translating the documents into English first. With Daticon EED's Discovery Partner®, the search itself is entered in the foreign language. This both speeds up the process and lowers your chance of translation errors.

#### **About Daticon Electronic Evidence Discovery**

*Daticon EED is a nationwide provider of eDiscovery services and technology with more than 20 years of experience managing the most complex and challenging eDiscovery projects. We combine a proven methodology, expert staff and our industry-leading Discovery Partner™ hosted review platform to significantly reduce the risk, cost and time of eDiscovery for global corporations and law firms. We offer services for both large and small cases, including case strategy, pre-review analytics, review optimization, early case assessment, as well as processing, hosted review and production. With headquarters in Kirkland, WA, and operations in Norwich, CT, Southern California, Chicago, New York, Washington, DC, and London, Daticon EED offers convenient regional support for national and international cases.*

*For more information, please visit [www.daticon-eed.com](http://www.daticon-eed.com)*

The Discovery Partner hosted document review platform lets litigation support and eDiscovery review teams analyze, organize and review documents and emails in most Western European languages, as well as languages based on multi-byte character sets, including Arabic, Chinese, Japanese and Korean. And our London data processing center complies with EU data privacy requirements.

In today's global economy, litigation can pop up anywhere in the world. Be prepared with Discovery Partner.

Some data sets may contain documents using legacy, non-Unicode character formats. To ensure, the type of character encoding being used, it is recommended that clients provide a data sample to verify Daticon EED system compatibility with the encoding format.
