

## Expert Services Reduce the Cost and Risk of eDiscovery

Our experts help to reduce the risk and cost of discovery for large, complex cases, using our core services combined with expert services such as:

### Early Case Expert Services

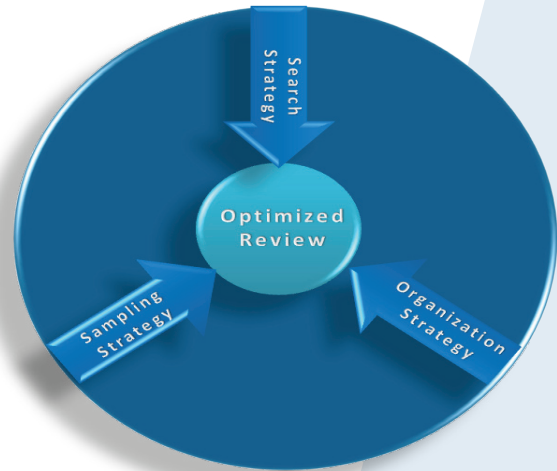

Our experts have repeatedly worked on some of the largest litigations in the US for more than two decades, providing expertise in:

- Rule 26(f) preparation
- Case and Collection planning
- Early case data analytics; data mapping
- Data sampling, social network analysis

With these services, our clients:

- Reduce exposure to potential sanctions
- Understand potential costs and exposure and review time
- Identify bad or exculpatory facts early on (Smoking Guns)
- Pro-actively identify inaccessible data sources reducing sanction exposure
- Engage experts early so mistakes are avoided and processes are documented for future defense of process

### Expert Evidence Analytics

Daticon EED's Expert Evidence Analysis service combines strategies developed by our experts with cutting edge technology and on-going consultation with the client and lawyers, utilizing:

- Expert case analytics
- Expert culling services
- Review optimization
- Review team planning & training
- Advanced review technologies

The client gets:

- 200% increase in review speed
- 50% reduction in all-in costs
- A fully documented, defensible process

### Expert Testimony

Our experts have successfully defended discovery processes on behalf of our clients in more than 100 Under Oath Events, such as:

- Expert reports
- Trial & hearing testimony
- Declarations & affidavits
- 30(b)(6) Deposition prep services
